

BLACKROCK

Investor Profile

Suited to investors seeking capital growth over the long term and diversification outside of the North American stock market. Investors should be able to accept a moderate level of risk.

Investment Objective

To achieve long term growth by investing in a diversified portfolio of international equities.

Investment Strategy

The fund intends to achieve its objective by replicating the holdings and returns of the MSCI EAFE Index. This index represents the performance of about 1,000 stocks from different stock markets in Europe and Asia including countries such as the United Kingdom, Germany, France, Hong Kong, Japan and Australia. In order to track the performance of the index, the underlying fund manager attempts to invest in all of the stocks that make up the index in the same relative weights as they are within the index. Small amounts of cash and/or money market securities (generally less than 1%) may be held for liquidity or pending investment.
