

BLACKROCK

Investor Profile

Suited to investors seeking a passively managed portfolio of fixed income and equity investments who have an anticipated retirement date in or around the year 2025. Investors should be able to accept a low to moderate level of risk.

Investment Objective

To provide for retirement outcomes by investing in broadly diversified global asset classes with asset allocations becoming more conservative over time.

Investment Strategy

The fund intends to achieve its objective by taking age-appropriate risk for investors expecting to retire around the year 2025. Investment is primarily in other BlackRock-managed index funds and exchange traded funds across the following asset classes: Canadian equities, U.S. equities, international developed market equities, international emerging market equities, Canadian fixed income, non-Canadian fixed income, real estate, commodities, alternative investments, and cash and equivalents.

It is expected that the fund will be merged with the Co-operators BlackRock LifePath Retirement Index Fund within five years of the date that its asset mix matches the asset mix of the Co-operators BlackRock LifePath Retirement Index Fund.
